Keywords

MPS SPS PLC

Problem (public)

What PLCs can I use with MPS?

Solution (public)

Actually any with enough inputs and outputs for the respective MPS station can be used.

We have created sample programs for the individual MPS stations for the most common PLC manufacturers that our customers work with. An overview of all available [1]sample programs for all MPS stations and PLC manufacturers with the Edutrainers can be found [2]here.

You are also welcome to use other controls with your own programs.

The amount of required digital and analog inputs and outputs for the individual MPS stations can be found in the technical documentation for the respective [3]MPS station.

An overview of all available Edutrainers and control types can be found [4]here.
