CIROS V7 included models

Problem (public)

I am looking for older/exotic models which are not part of the CIROS model library. Are there any additional models as part of the installation provided in CIROS?

Solution (public)

Additional to our curated model library, CIROS also contains older or unfinished models which are provided -as-is- and for use without any support.

By default, all models are installed to this location: [1]C:\Program Files\Festo Didactic\CIROS 7.1\CIROS Models.

All models included in CIROS 7.1 can be found in the attachment.
