course translation

Problem (public)

Why are certain terms translated incorrectly on LX?

Solution (public)

The problem occurs because you have activated the translation function on your
browser. This can lead to problems with Festo LX.

To solve this, deactivate the automatic translation feature:
- Click on the three dots on the top right of the window.
- Click on Settings.
- Click on Languages
- Turn off Offer to translate pages that aren't in a language I read.
